

Science

In science we will be identifying, naming, drawing and labelling the parts of the human body and learning which part of the body is associated with which sense. We will be learning about how we grow and change and what we are able to do at the different stages of the human timeline.

Year 2's will be finding out about and describing the basic needs of animals, including humans, for survival (water, food and air). Children will learn about the different food groups and the importance of eating the right amounts of different types of food. Finally we will learn the importance of hygiene and exercise for a healthy superhero lifestyle !

RE

We are focusing on ourselves and learning to recognise our feelings and those of others. Our school value this half term is "Forgiveness" and we will be spending time in collective worship reflecting on how saying sorry and forgiving our friends stops us carrying around unhappy thoughts. We will learn about Jesus' rules and talk about the rules that Jesus thought were important. Finally, we will reflect on the five pillars of Islam and the rules that Muslims live their life by.

DT

In cooking this term the Year 1s will be learning to use a peeler and to hold and cut a knife using the bridge and claw methods.

Year 2s will be making apple and apricot filo parcels. They will be measuring folding and shaping pastry.

Art

We will be looking at the works of Andy Warhol and Roy Lichtenstein. The children will use simple printing equipment including blocks, stampers, printing foam to create repeated patterns or images. They will be experimenting with colour schemes and contrasting colours.

ICT

We are very excited about ICT this term. The children will be creating their own superhero comic strip using a app. This will involve the children planning their own story and superhero character. They will learn that in order to create the storyboard they will need to follow a sequence of instructions to save and edit their work.

History

In history we will be learning about Florence Nightingale, her role in caring for wounded soldiers and why she is a significant individual in British history. We are also going to be looking at old films and how they are different from the films that we watch today.

Finally we will learn about the restoration of an old local cinema looking at how it used to look and what films it used to play.

Music

We will be warming up our voices and filling our classroom with songs. We will learn songs with an echo and use instruments to keep the beat. We can't wait for you to see our performances at Share.
